Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

The IDS filed 9/14/04 has been considered and placed of record. An initialed copy is attached herewith.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1, 6-11 and 17 rejected under 35 U.S.C. 102(b) as being anticipated by one of Pettinato (US 6,489,746) and Lewis (USD 338,673). The reference '746 discloses a remote control having a control module for controlling an electronic device such as a TV, a VCR or the likes and a charge receptacle 24 (plug into the wall receptacle) for receiving the remote control. It further has a charge indicator in the form of an LED light. See figure 1. The reference '673 discloses a similar remote control charger with its own charging stand.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2838

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 and 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over one of Pettinato (US 6,489,746) and Lewis (USD 338,673). The reference does not disclose the charge receptacle being an integral part of the electronic device and/or its position in relation to the device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have placed the charge receptacle anywhere in relation to the electronic device, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

The reference further does not disclose a power charge bar display. It would have been obvious to one having ordinary skill in the art to have employed a power charge bar similar to the one used in all mobile phones for the purpose of communicating a more accurate "picture" of the charge status to the user.

The reference further does not disclose a paging device. It would have been obvious to one having ordinary skill in the art to have provided a page system similar to the one found on cordless phones for the purpose of locating the remote in case of misplacing by the user.

Conclusion
